THE SCIENCE OF WEATHER PREDICTION.

Pictures taken at a government weather observatory reveal in a simple way how the data is gathered upon which weather predications are made. The scientific instruments used in measuring wind velocity, humidity, rainfall, etc. are shown and explained in careful detail.

This document is from the Library of Congress "Motion Picture Copyright Descriptions Collection, 1912-1977"

Collections Summary:

The Motion Picture Copyright Descriptions Collection, Class L and Class M, consists of forms, abstracts, plot summaries, dialogue and continuity scripts, press kits, publicity and other material, submitted for the purpose of enabling descriptive cataloging for motion picture photoplays registered with the United States Copyright Office under Class L and Class M from 1912-1977.
